PC Stitch 11

da: PC Stitch

Modello: SCHHOF12-1113

PCStitch 11: The Ultimate Stitching Software! The new version of PCStitch that combines the features of the v. 9/10 and of the PCStitch Pro, now reunited in a unique product!

PCStitch is advanced, but it's perfect for any cross-stitcher. Just released, this new version is packed with new enhancements:

- **Now Includes Over 2000 Individual Designs and Over 90 Stitched Alphabets**: it has been arranged with Jeanette Crews Designs to include all of the library patterns and alphabets formerly associated with the Pattern Pieces with PCStitch 10 at no additional charge
- **Share Your Designs with the Community of PCStitch Users**: you can join the growing community of PCStitch users to share patterns that you have created using the PCStitch 11 software without ever leaving the program
- **Stamped Cross Stitch Printing**: you can print a reverse image of your designs for use with transfer paper to create stamped cross stitch or needlepoint projects
- **Improved Available Floss List Panel**: the available list panel now allows you to use different list styles and sorting options to maximize the area showing the flosses you can add to your design palette
- **Integrated Floss Editor**: the floss editor is no longer a separate program. You can now access it directly from the menu in PCStitch 11
- **PatternsOnline.com Interface**: PatternsOnline.com users can now access their account and purchased patterns directly from within the PCStitch 11 program
- **WIA Scanning Interface**: you can now import directly from any WIA compatible device, as well as any TWAIN compliant scanner or digital camera
- **Increase to 10 Levels of Undo**: with PCStitch 11, you can undo the last 10 changes you have made to your designs with an easy click
- **Print Floss Usage on Color Key**: you can now print the stitch count and floss usage estimate directly on the color key page when printing your pattern
- **Color Symbols Printing Option**: PCStitch 11 now allows you to print your designs using symbols in the actual floss color without individually setting the colors of each symbol
- **Read-Only Designs**: you can optionally not allow a design to be changed based on a password that you supply for the design

Recommended system requirements: Windows XP, Vista or higher.
